1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. The species best illustrated by figure 1.
- II. The species best illustrated by figure 2.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable **and to identify those claims drawn to the elected species.**

Currently no claim is deemed generic.

2. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

3. A telephone call was made to Larry M. Williams on 14 June 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
